## JOIN THE CARNOISSEUR FRANCHISE TEAM

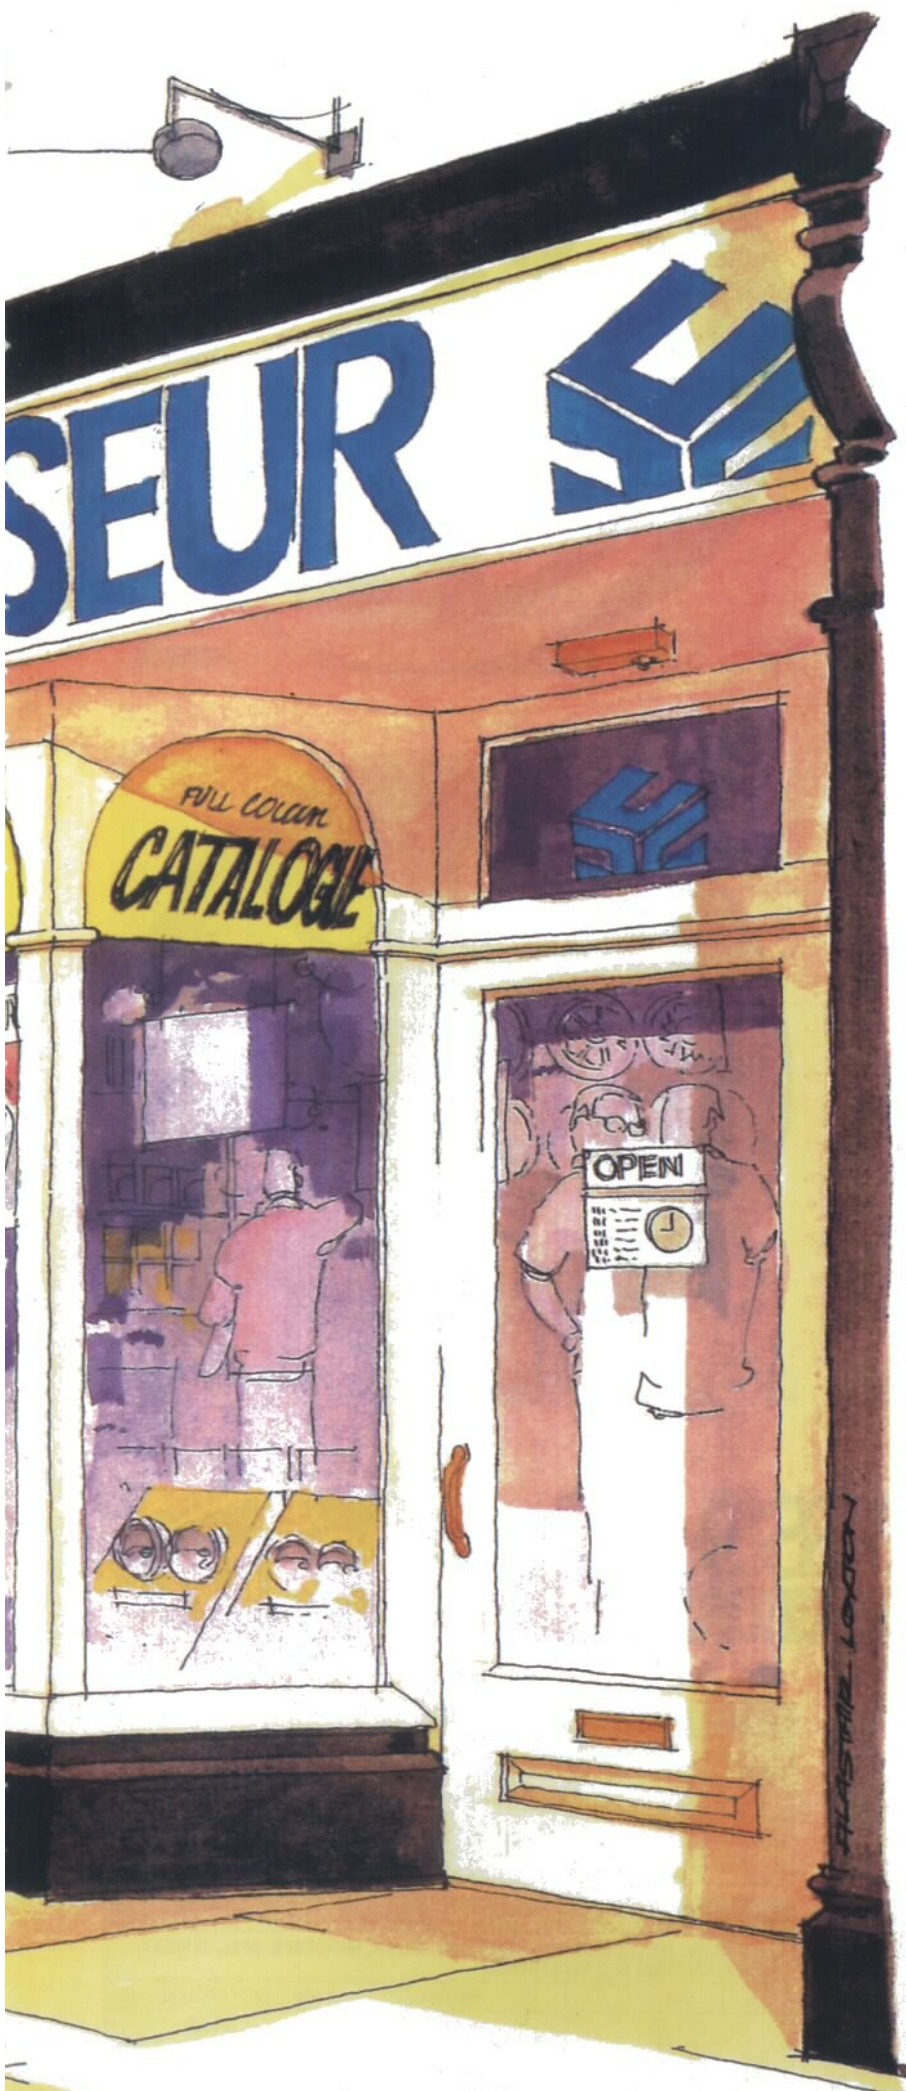

Everyone aspires to running their own business, but it could be your dreams that come true by owning a Carnoisneur Shop. Initiated by the success of its Dunstable store, established back in 1987, Carnoisneur is now undergoing an expansion programme.

1994 sees the opening of outlets in Oxford, Sheffield and Leeds adding to Bedford and Southern Ireland which were established in 1993.

Selling car accessories may not be an original idea, but Carnoisneur's uniqueness lies in its ability to offer an extensive range of product brands, not only from well-merchandised shops, but also through a comprehensive catalogue. The product portfolio, which incorporates over 4,500 innovative items, is updated annually and includes the latest designs in Italian Alloy Wheels and Steering Wheels, plus many new accessories from security devices to audio equipment.

## OUR ADVANTAGE

As an established business within the motor trade, the Carnois seur franchise concept has far greater prospects than trying to 'go it alone'. With the help of a franchise support package, the unique retail shops are easy to operate, manage and promote. The Carnois seur package provides assistance in the following areas:

### • MARKETING

Marketing always plays an important role in the development of a business. To create maximum market potential, regional promotional activities will underpin the initial opening of your store, whilst regular national advertising will support your business on an ongoing basis. Quality promotional material, which includes point of sale literature, brochures and the Carnois seur catalogue, will also be supplied as part of the marketing package.

### • TRAINING

Our comprehensive training programme is designed to cover all aspects of retail considered vital to your success. The course teaches sales and management skills and imparts a thorough knowledge of the Carnois seur product.

### • PRODUCT SUPPLIES

Carnois seur has already developed a strong alliance with the major suppliers within the motor trade. Hence, a fast supply of merchandise at highly competitive rates can be guaranteed for both you and your customers. We also keep abreast of new products and latest market developments in order to maintain our unprecedented range of car accessories.

### • SUPPORT CATALOGUE

The Carnois seur Catalogue is a strong marketing tool for promoting both franchise operations and sale of accessories. Its circulation currently exceeds 120,000 copies.

### • FINANCE

To open a typical Carnois seur shop will cost in the region of £30,000 including stock, shopfittings, training etc. The franchisee will require an initial investment of £10,000 and Carnois seur will assist in arranging the balance through one of the major clearing banks.

## FRANCHISE LOCATION

Carnois seur is also able to assist you with the selection and location of your shop.

Included in the selection process is an important feasibility study which addresses such key factors as store visibility; car and pedestrian traffic; car parking availability; population density and distance to potential residential areas.

## DESIGN AND PLANNING

Once lease contracts and planning consents have been agreed, our interior designers will propose a full shopfitting specification and design layout, reflecting the corporate identity that has already proved to be so successful.

## THE FRANCHISE PARTNERSHIP

Carnois seur offers an opportunity for independence and profitability, but the ultimate success of any business is determined by the commitment of the owner – a commitment that seeks triumph and rewards personal accomplishment.

We are confident that Carnois seur has taken as much of the risk out of business ownership as possible, and that our programme is complete and accurate. Being in a market place that is little affected by seasonal trends, we strongly believe that we offer a sound business opportunity with excellent profit potential.

From the signing of the franchise agreement we will provide ongoing support to help you achieve your goals. Once you are up and running, regular contact will be maintained through periodic meetings and regular visits to your shop. We are always available to offer help and advice, since your success is naturally important both to you and the future growth of Carnois seur.

## THE FIRST STEP

We recommend you study our catalogue and visit a Carnois seur Shop to gain a broad insight into our unique business operation. If you like what you see and believe you have the enthusiasm and dedication to run a Carnois seur Shop, please write to Neville Crow at Carnois seur. We will then forward to you a full prospectus giving further details of the Carnois seur franchise opportunity.

### OZ RACING WHEELS

#### - FOR ROAD USE

Participating in motor races requires investment and extensive research, a hard task, but winning is even harder! For years O.Z. Racing wheels have been at the top of all motor racing activities. Over a half of the starting grid at every Formula One Grand Prix use the yellow striped O.Z. Racing wheels.

The eight teams racing on the magnesium wheels created by O.Z. Racing are: Benetton, Lotus, Footwork, Jordan, Ligier, Venturi-Larrousse, March and Tyrrell.

In Rallying, the most prestigious official works teams such as Toyota, Lancia, Ford, Nissan and Mazda race and win on the O.Z. magnesium wheels personalised by the red painted O.Z. Racing logo.

For touring cars, in the highly competitive DTM Championship, the works Mercedes AMG cars win on 18" O.Z. wheels.

And furthermore: Touring, Formula 3000, Formula 3, Endurance... all specialities where the trademark O.Z. is used, races and wins. An irreplaceable laboratory for the mass production of the after market alloy wheels.

# YOKOHAMA HIGH PERFORMANCE RADIALS

"Yokohama equipped cars have won the British Touring Car Championship for the last four seasons (1989 to 1993)".

## 1 YOKOHAMA AVS. ADVANCED VEHICLE SYSTEM

Yokohama invite you to experience a world where sport driving has been redefined, the world of Yokohama's Advanced Vehicle System – AVS. AVS was born between the circuit and the street, in a world where speeds beyond 300kph (186mph) are 'ordinary'. AVS tyres aren't just improved street tyres, they are racebred, professional-quality radials specifically designed to bring the performance of the circuit to the street. That's the AVS design philosophy.

## 2 YOKOHAMA A008. ULTRA-HIGH PERFORMANCE ROAD & COMPETITION TYRE

Many radials perform well, but not many can perform as long and hard as the A008. Its tough, steel belted radial construction provides powerful tread support for stable cornering and braking at high speeds. Full nylon belt covers prevent belt rise, and rigid bead fillers ensure crisper handling and lightening-quick steering response. The extraordinary performance radial.

## 3 YOKOHAMA A510. HIGH-PERFORMANCE ROAD TYRE –THE LATEST FROM YOKOHAMA

A unique tread pattern and profile for an entirely new kind of high performance tyre developed from Yokohama's advanced technology and racing spirit in the global motorsport arena. Now one tyre receives the full benefit – the Yokohama A510. With the MGP tread pattern that raises performance in the wet with no sacrifice of massive grip in the dry. With four-in-one blocks that dramatically improve cornering performance. And other features, like the FT-410 tread compound that predictably delivers high grip under varying conditions, yet wears tough for a long tread life. It's no ordinary tyre. It's tuned to perform at truly world class levels – it's the innovator.

## 4 YOKOHAMA A509. HIGH-PERFORMANCE ROAD & COMPETITION TYRE

Race circuit proven to deliver the most advanced high performance radials. Realise your driving potential on Yokohama's A509. Superb high-speed stability, crisp steering response and cornering power designed from the circuit. Redefined for the street. A series cultivated for the driving experience.

replacement shock absorbers. Through the continuous and intensive test programmes on various European roads they have built up a full range of top quality replacement shock absorbers for European and Japanese cars.

These gas shock absorbers combine extremely good value for money with excellent quality.

**KYB Gas gives a satin-smooth ride plus the better response only gas shocks can deliver.**

Patented valving plus pressurized Nitrogen gas account for riding comfort and at the same time, dramatically reduce the aeration or foaming that commonly occur in conventional shocks and cause performance to start fading, even after only a few minutes in operation. Preferable for the customers who want to feel the difference.

### CHASSIS DYNAMICS

#### 2 SUSPENSION KITS

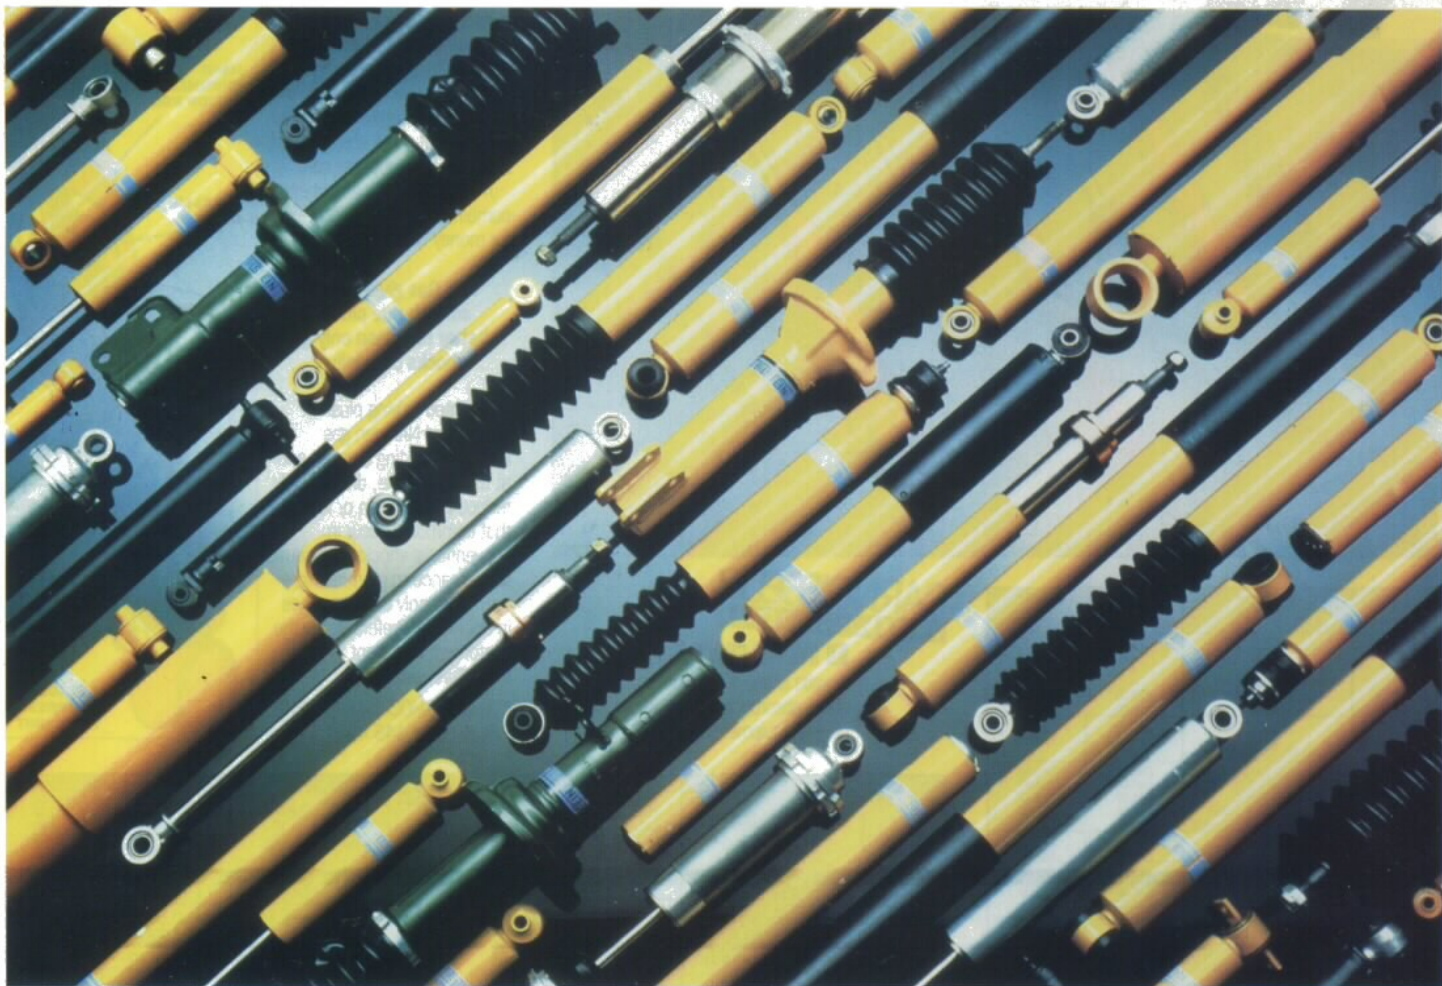

The combination of Chassis Dynamics high performance, lowering springs and Sachs Super Gas Sport shock absorbers, offers improved cornering and braking, together with greater directional stability with reduced body roll.

These improvements in handling, the lower sporting appearance and the sensible prices, make these chassis dynamics suspension kits unbeatable.

# chassis dynamics

Only suitable for models stated and not Cabriolet, Estate or models with self-levelling systems.

## BILSTEIN GAS SHOCK ABSORBERS

Fit Bilstein gas pressure absorbers and driving becomes a totally new experience. Why? Because Bilsteins produce a damping accuracy that gives a guarantee of outstanding roadholding, even under the most arduous conditions.

Bilsteins are used by most car manufacturers' official race and rally teams which proves durability. Because 30% of manufacturing costs are spent on quality control, you're assured of a longer lasting product. Little wonder that Bilsteins are specified for original equipment on most of the top models from Porsche, BMW, Mercedes, Opel and Ford, as well as all models from Britain's Caterham Cars.

## EIBACH

When it comes to performance cars, the principle is simple – they should be able to go, stop and handle better than their run-of-the-mill counterparts.

Roadholding is governed by the performance of three main suspension components:

the springs, shock absorbers and anti-roll bars. Springs support the weight of the vehicle and affect roll resistance and pitch. The shock absorbers' main function is to dampen unwanted spring oscillations. Anti-roll bars reduce body roll and pitching.

Eibach have used their considerable experience in European motorsport to produce a range of anti-roll bars specifically for the serious performance car enthusiast.

Their precisely matched (and TUV approved) front and rear anti-roll bars create an accurately honed suspension, giving race bred performance with the optimum balance of understeer and oversteer. As you would expect from a German company, every component is designed, researched and tested with the utmost thoroughness. And, in conjunction with Eibach's Pro-kit lower suspension packages, the anti-roll bars offer you even better performance.

## EIBACH LOWERING SPRINGS

Eibach built an enviable reputation for supplying very high quality springs to many of the world's leading motorsport teams.

We offer Eibach 'Pro Kits' – progressive rate lowered springs for road use. See table for applications and prices.

# JETEX EXHAUST SYSTEMS

## TECHNOLOGY, QUALITY, PERFORMANCE, WITH A SOUND THAT CALLS THE TUNE

### JETEX SYSTEMS AT A GLANCE:

- Swedish high-quality steel.
- Reduction in back pressure – up to 82% for some applications.
- Professional design.
- Pleasant exhaust note.
- Improved output compared with standard systems.
- Easy to assemble.
- Complete systems (unless original front pipe is indicated) with fitting kits.
- 12 months guarantee.
- Every Jetex system is boxed.

Jetex have introduced a range of performance exhausts which meet the EEC type approvals. Designs include an engineered front pipe to increase torque in the low and mid-range (no need to change the manifold) and for cars with catalytic converters Jetex have suitable exhausts available.

Jetex Exhaust Systems are manufactured in Sweden. Production takes place in a new purpose built factory.

With Jetex Exhaust Systems the engineers have concentrated on solving a number of technical problems. A thorough programme of testing performance, fuel economy, noise and exhaust levels as well as back pressure (to name a few) have provided answers which give advantages in all of these areas, combined with durability and purpose-designed packaging.

### GENERAL

Two basic methods can be used to dampen exhaust noise – absorption damping and reflection damping. The reflection method is cheaper as a rule, and technically easier to construct, but it has side effects, among them high back pressure which reduces power output and frequently increases fuel consumption.

Absorption damping, however, while being technically more complicated to manufacture, has the advantage that the exhaust gases are removed efficiently so that neither performance nor fuel consumption are affected. Jetex Systems are of the absorption type.

### PERFORMANCE

Performance testing is carried out using computerised chassis dynamometers theories to be examined before deciding on the final design. Other important factors taken into consideration are back pressure, carbon monoxide levels, inlet manifold temperature and fuel consumption.

### NOISE LEVELS

It is a common misconception that sport systems automatically mean more noise. With Jetex designs the noise levels are always below the legal maximum, and comply with the officially approved noise levels for motor vehicles.

## ANSA THE ITALIAN STYLE OF PERFORMANCE

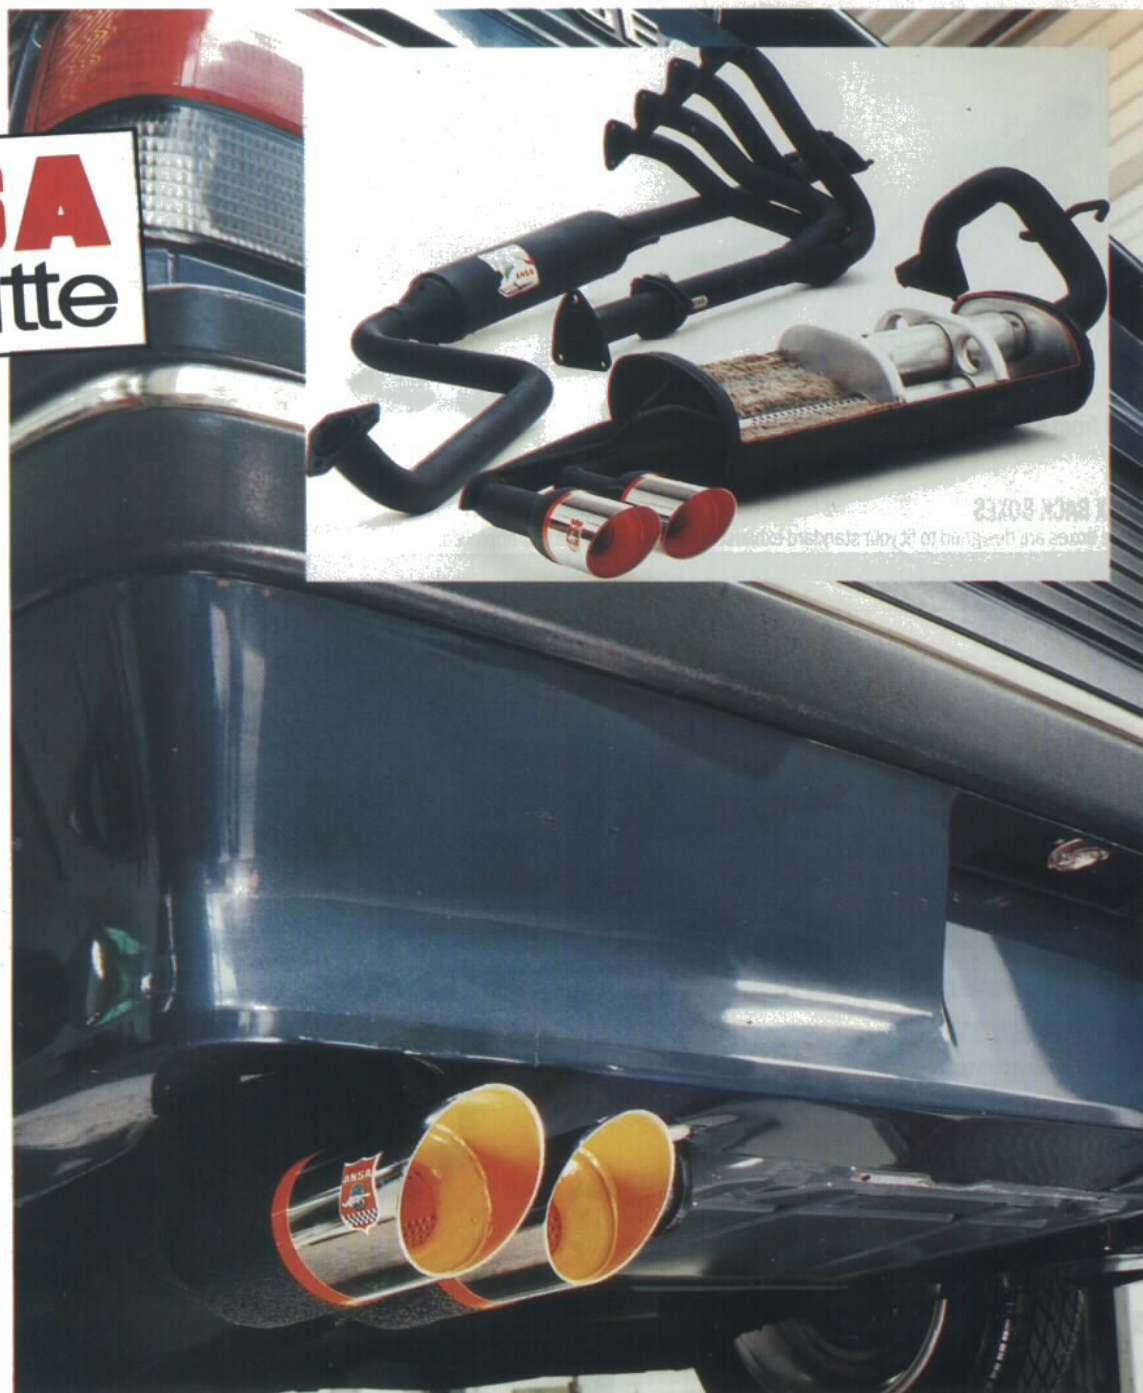

Unleash the hidden performance of your car's engine with ANSA... the higher performance exhaust system. Engineered to maximise torque and power. Designed to provide remarkable bolt-on performance, faster acceleration, great looks and the unmistakable ANSA sound of power.

Installing an ANSA Free Flow exhaust system will almost certainly give you the best performance increase for the smallest investment.

ANSA are original equipment suppliers of exhausts to all the great Italian Marques, and it is this experience that they have brought to bear on the sports systems listed to give power improvements of up to 14% plus.

Recent independent tests by magazines in the U.K. of the Golf, Fiesta, Uno Turbo etc. have all borne out the claims made and tested by ANSA themselves.

Quality is maintained by using only the best aluminised steel 16-18 gauge. Computerised design methods ensure a trouble free fit. 18 month guarantee.

## 1 PIPERCROSS HIGH PERFORMANCE AIR FILTERS

Pipercross High Performance Air Filters have long been the choice of winning race teams across the world, from formula 1 to top rally names, Le Mans to works saloon car teams. Now there is a Pipercross filter to put your car in a class of its own.

Developed in association with Loughborough University and the Motor Industry Research Association, these specially-treated filters give up to 10% more power by creating a better airflow through the carburettor. They also last up to four times as long as paper alternatives, are highly flame retardant and are simply fitted by replacing the existing element in the standard air filter housing.

Join the winners by choosing a Pipercross direct replacement air filter for your car — ordinary filters seem flat in comparison.

## 2 PL200 AIRSTREAM

Competition/Performance Air Filters.

- 40mm high element, finished in red as shown.
- Ultra efficient chromed air filter.
- Unique 3 layer construction, as used in international competition by Ford, General Motors, Jaguar, Toyota and many more.

Unrestricted airflow even in the worst conditions combined with the highest level of filtration. The vast dirt holding capacity ensures the filter flows efficiently up to three times longer than paper or other filter media.

Please state make and model of carburettor when ordering. This information can usually be found on the carburettor itself or in the vehicle handbook.

2 £37.95

## 1 COMP AIR FILTERS

British made high performance air filters for most cars. Renowned for their mirror-like chrome finish, they are more compact than standard filters and provide greater access to the engine bay. Fitted with a fire-retardant washable foam element to achieve a much improved air flow.

Supplied specifically for your carburettor in either round, D-shape or rectangular shape.

Please state make, model and year of vehicle when ordering. The filter supplied will generally be the largest possible to fit the available space.

## JETEX

## 7 RESPONSE AIR FILTER ELEMENTS

The new 'Response' range of air filters and induction kits have been introduced to complement the Jetex exhaust system range.

Jetex Response systems come pre-oiled and ready to fit. Once fitted they should last the life of the car. They just need cleaning and re-oiling at usual service intervals.

They offer superior dust filtration

and around 40% better airflow than a standard paper filter. This of course translates into more power and better performance. Fitting is a simple bolt-on affair, with everything required for the installation included in the kit. On diesel and turbo-diesel engines no adjustment is required. For petrol engines we recommend having the CO levels adjusted at your local MOT garage after an initial 30 miles run-in period.

Jetex Response Air Filters are available for almost all popular makes and models.

Please state make and model when ordering.

## AIR INDUCTION KITS

On a great many modern cars the route taken by air entering the engine is quite tortuous. From the duct behind the main grill it is

pipel around numerous bends, required to avoid engine bay obstructions, to the airflow meter and ultimately the throttle body. Each bend creates a restriction which slows the airflow and reduces power.

Jetex air induction kits are designed to replace the original pipe work and simplify the route taken by the air charge. Kits are specific to each make and model, but generally consist of a Response air filter, air flow meter connection and all pipework and fittings required to complete the installation.

## 8 BRAIDED BRAKE HOSES

Manufactured in the United States, these hoses and fittings are of the highest quality.

They are supplied as a set for your particular car. Please state make and model when ordering.

## TAR•OX BRAKING POWER

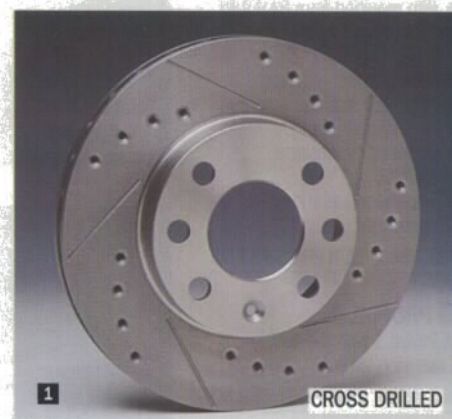

- High Performance Brake Disc/Pads
- 12/40 Grooves/Cross Drilled
- Magnesium Alloy Race Calipers
- Maxi Grip Brake Drums
- For Road, Rally or Race
- Direct replacement Discs for most European Models.

## TAR•OX DISCS, DRUMS AND PADS

Available in 12 groove for fast road use and 40 groove for highly modified road cars and race use, they offer improved brake fade characteristics through:

- Automatic pad de-glazing
- Higher braking temperature range
- Tighter machine tolerances.

Improved grip is also achieved through the use of a high grade and slightly softer disc material. Available for a wide range of applications in both front and rear discs and drums with the pads available in both front and rear discs and drums with the pads available in heavy duty road compounds. Only the most popular applications are listed so please contact for details of those not shown.

## 6 AUTOMEC SILICONE DOT 5 BRAKE 7 CLUTCH FLUID THE ULTIMATE IN BRAKE FLUID TECHNOLOGY

Developed and tested rigorously over many years. Automec's Silicone Brake Fluid complies fully with FMVSS 116, ISO 4925 and the latest D.O.T.5 specifications.

## UNIQUE PROPERTIES

**Non-Hygroscopic:** unlike conventional fluids (which ideally should be changed each year) Automec's Silicon Brake Fluid does not attract or absorb water vapour. This eliminates brake component corrosion and loss of braking efficiency through vapour lock.

**Non Corrosive:** does not harm paintwork nor does it have any harmful or corrosive effect on rubber seals, plastics or metals in the braking system.

Complete with tie on tag which can be secured to fluid reservoir to guard against the accidental topping up with the wrong fluid.

## BOSCH SPARK PLUGS

### 1 BOSCH PLATINUM SPARK PLUGS

The Bosch Platinum centre electrode of 99.9% pure platinum, combined with a new manufacturing process of sintering the electrode into the insulator, means:

- Maintenance free — after being 'gapped' and installed, checking and regapping becomes obsolete
- Maximum fuel economy — Bosch Platinum reaches working temperature quicker
- Improved starting — because the insulator nose is taken further into the engine
- Greater flexibility — to combat misfiring in slow moving traffic
- Improved exhaust emissions — for a healthier environment

Available for most cars.  
Please state make, model and year of car when ordering.

(each)

## BOSCH WIPER RANGE

### 1 BOSCH SPOILER WIPER BLADES

The new wiper blade in aerodynamic form from Bosch. Bosch Spoiler – wind tunnel developed and tested.

Bosch Spoiler – clear vision even in the strongest of headwinds.

The aerodynamically shaped 'spoiler' is mounted on the wiper blade frame ensuring the best visibility possible even in the most extreme conditions. As air currents and headwinds increase, the spoiler automatically increases the pressure of the blade on the windscreen, combined with the renowned Bosch Micro-Double Edge, the result is optimum down force at all speeds which means no lift-off, no flutter, and smear free clear vision, no matter how strong the headwind.

Available for ALFA-ROMEO, AUDI, BMW, FIAT, FORD, HONDA, LEYLAND, MAZDA, NISSAN, OPEL, PEUGEOT, PORSCHE, VAUXHALL, VOLKSWAGEN and VOLVO. Please state make, model and year of car when ordering.

### 2 BOSCH 'TOP' WIPER BLADES

A wiper blade should remain in full contact with the windscreen at all times to ensure perfect vision and safety.

To meet these requirements Bosch, Europe's largest wiper blade manufacturer, designed a technically superior Wiper Blade. Instead of a single edge, Bosch blades have a unique micro double edge with a contact width of only 10/1000 mm. This design, subjected to 30 different tests, ensures that Bosch wiper blades work equally as well coping with a fine drizzle or a torrential downpour.

### 12 FILTER KING

The well known fuel saver from Malpassi. Tests and trials as well as many satisfied customers claim savings of 10%-15%. The Filter King regulates the pressure of fuel delivered by the car's petrol pump to help maintain a steadier float level in the carburettor thus preventing expensive fuel surges and flooding. Its effective filter acts as an extra benefit to trap any dirt or water which may

contaminate the petrol supply. The Filter King is fitted as standard by Alfa Romeo and Maserati.

Hundreds of thousands sold worldwide already. The relentless increase in the cost of motoring means that any aid to fuel economy must be considered an essential fitment. Not suitable for cars with fuel injection.

### 1 HOT JET

Banish dirty, greasy, frozen windscreens and washer pipes with the Hot Jet.

- So easy to install.
- Cleans with hot water.
- Safer clearer vision.
- Works when other systems freeze.
- Clears grease, film, insects, mud.
- Ideal summer/winter.
- No moving parts to go wrong.

No matter what vehicle you drive a clear windscreen is a must, not only for your own safety but others. The fact that hot water cleans better than cold is only one of the many reasons for fitting the Hot Jet now. So simple to fit, all you need is a pair of scissors to snip the small plastic supply pipe to your washer jets and connect the Hot Jet. Its special red heat exchanger is held to the upper radiator hose of any water cooled car with the universal clips supplied. As soon as your engine begins to warm the transferred heat is busy defrosting the washer pipes and it can then de-ice your windscreen without the need for expensive de-icing chemicals thus saving you £££s. The Hot Jet will break down grease and grime and give you a clear windscreen in summer and winter. Complete universal kit with full instructions for any water cooled car.

291 1036 OUR PRICE £9.95

### 2 TWINS

Twin Windscreen wipers

- Unobtrusive aerodynamic design for efficiency and maximum screen contact.
- Greater pressure applied to windscreen at faster speeds.

## **5 BEAM BENDERS**

Beam Benders are universal headlamp converters for continental driving. One size fits most vehicles. Unlike other products, Beam Benders do not block out light, they simply re-direct it at the correct angle.

They are optically designed contact lenses which cover the area on the headlamps from which the dipped beam emerges. Beam Benders are self-adhesive and simply stick onto the headlamp glass without the need for cutting or trimming. No technical knowledge is required and they can be fitted in seconds. Being only 1mm thick, they will not impede the use of headlamp wash/wipe systems.

## CRUISE CONTROL

### WHY BUY A CRUISE CONTROL?

Cruise Controls have long been popular in the United States and understandably so. Long distances, open roads and speed restrictions make cruise controls almost a necessity. But gradually, European drivers are coming to recognise that a cruise control can also be meaningful over shorter distances and in heavier traffic conditions.

They have discovered that not only does a cruise control prevent accidental speeding but also reduces fuel costs by up to 15%.

### HOW DOES A CRUISE CONTROL WORK?

The 'heart' of the system is a micro-processor that memorises any speed chosen by the driver and, by regulating the throttle actuator, enables the vehicle to be maintained at that constant speed.

This means that once a speed has been programmed by touching the SET button, your foot can be taken away from the accelerator pedal. Whether up hill or down dale, the cruise control will adjust the movement of the throttle and hold the vehicle to the desired speed.

For safety reasons, a cruise control does not operate at low speeds (normally not under 25mph). It can be switched on or off at will and is immediately and automatically disconnected by pressing the brake pedal or, on manual vehicles, by changing gear. Touching the resume button will cause the vehicle to accelerate until it has reached the last set speed.

Cruise controls eliminate abrupt throttle movement and consequently reduce fuel consumption.

Autocruise Cruise Controls are simply installed on most 12v vehicles and come complete with fitting instructions and all necessary hardware for the DIY enthusiast.

### 1 AUTOCRUISE CRUISE CONTROL

All parts supplied for complete installation.

- Labelled and colour coded wires.
- Easy to follow installation instructions.
- LED 'engaged' light.
- Utilizes ignition coil or speedometer output to sense speed.
- Brake switch connection disengages cruise with a tap of the brake.
- Backlit command module for night driving.

## ELECTRONICS

### 20 DIRECTION INDICATOR BLEEPER

Super all-electronic unit 'bleeps' whenever the car's indicators flash, thus eliminating the possibility of forgetting to cancel them. There are only three wires to connect. A brilliant safety product.

200 1556 OUR PRICE £8.95

### BRAKE LIGHT MONITOR

Gives immediate warning of brake light bulb failure. With both brake lights in good working order, the Monitor displays a single green light, but if a brake light bulb fails, the Monitor shows two bright red lights to warn the driver. Works automatically every time the brake pedal is pressed — does not affect normal operation. Uses 'ever-living' LED lights — no bulbs to replace. This unique safety device is connected by means of three wires, and suits

all 12 volt vehicles having one brake light on each side. Complete with connectors.

200 1557 OUR PRICE £8.95

### BATTERY STATE INDICATOR

Shows by use of LED lights, general battery condition and faulty connections.

200 1552 OUR PRICE £12.95

### SCREENWASH LEVEL INDICATOR

Fully automatic. Easy to install.

200 1553 OUR PRICE £12.95

## ELECTRIC LIFE POWER WINDOWS AND SUNROOF CONVERSIONS

### 1 POWER WINDOWS

Each kit contains 2 factory matched power windows, switches, wiring, window winder blanking plugs, instructions and all required fittings. With applications for virtually all vehicles, these kits offer the appearance and performance of factory fitted power windows.

Kits available for front and rear windows. Please state make, model and year of vehicle, plus front or rear windows when ordering.

Kit for pair of windows  
250 4502 OUR PRICE **£199.00**

### 2 POWER SUNROOF CONVERSION

This power kit is suitable for factory fitted sunroofs only. It comes complete with motor, interior light support, switch and wiring. Installation is quick and simple following the instructions supplied. See applications table.

### 3 LUCAS SERVOGLIDE XL POWERED WINDOW KIT

The comprehensive kit of parts includes fully illustrated fitting instructions to guide you through installation. Total fitting time should be less than a day.

- New Slimline Motor.
- Centre Console Switching.
- Comprehensive Parts Kit.
- Fully Illustrated Fitting Instructions.

The suitability of Servoglide for a wide range of cars has been achieved by incorporating the existing winder mechanism into the system. Lucas manufactured, it has at its heart a powerful 12V motor, slimline in design which means that it's better suited to working within the narrow confines of the modern car door and which powers through a flexible drive a low profile universal gearbox mounted on the window regulator mechanism. Should electrical power fail the regulator mechanism can be operated manually with the reserve handle provided. See applications table.

### 4 ZERO BLACK ICE EARLY WARNING SYSTEM

Black ice or freezing road conditions claim many lives every year and can also cost motorists a lot of money in accident repair bills.

ZERO ICE DETECTOR is an advanced warning device that translates air temperature to a simple display on the dashboard to warn the driver of deteriorating road conditions. At a time when in-car heating and comfort have become so effective it is difficult for the driver cocooned inside to detect whether the outside temperature is just above or just below freezing. These critical few degrees can make all the difference between an innocuous patch of moisture on the road or a deadly stretch of black ice.

ZERO comes complete with easy to follow fitting instructions and is simply installed in any type of vehicle.

254 4482 OUR PRICE £36.95

### 4 SAFEFIT

SafeFit is a seat belt adjuster for children aged 4 years and over – too big for child seats and too small for seat belts.

Children are much safer wearing both a lap and shoulder belt than just a lap belt alone. Unfortunately, shoulder belts in

cars usually do not fit children. The belt rubs against the child's face or neck and usually gets pushed away behind the back or under the arm. In an emergency stop or accident the seat belt is ineffective and the child flies forward.

The solution to this is a SafeFit Shoulder Belt Adjuster. By slipping this soft, well padded sleeve into position, the shoulder belt can be adjusted to fit the child comfortably and safely! The sleeve gives extra abdominal protection and even more important, children love wearing it. Available in Blue, Green, Pink or Yellow. Please specify colour required when ordering.

254 4418 OUR PRICE £9.50

## COBRA SEATS

### 1 DAYTONA SPORTS

The new Cobra Daytona Sports seat owes its classic lines more to stress engineering and ergonomics than any stylist's whim, and in the process has evolved into possibly the most aesthetically pleasing seat Cobra has yet produced.

The Cobra Daytona Sport has been designed to be the first truly multi-purpose road, race and rally seat available. Its graceful curves offer proper ergonomic location and full lateral support for the rigours of competition. Guides are even provided for a full competition harness, however, the sqab sides have been designed to allow easy entry and exit on everyday shopping trips.

This combination also makes the Daytona a natural choice for luxury 4 wheel drive vehicles where off-road comfort is as important as everyday practicality.

The secret lies deep inside.

An all steel backrest with side bolsters and integral headrest, and an all-in-one Pirelli suspension pan are generously covered in high density polyurethane foam for comfort and safety.

Available in original equipment quality cloth in plain grey (Raven), plain black (Blackrock) or grey with astral centre panels (as shown).

## BBS STEERING WHEELS

If you want to combine a way of life, luxury and style you ought to appreciate the exquisite, irresistible flair that originates from a BBS steering wheel.

BBS have their leather steering wheels produced where the true craftsmen for this material have always lived: in Italy. Each BBS leather steering wheel is produced from the finest calf's leather and hand-crafted to perfection. Thus every example is a masterpiece — an unmistakable original. The very first touch, the first grip of the wheel is a sensual experience.

For overall beauty, selected materials, and the high standard of workmanship impress at first glance. Technical perfection has to go hand-in-hand with an appreciation of beauty. Only then is a steering wheel a genuine BBS leather steering wheel.

## BLAUPUNKT

Blaupunkt Bremen, Frankfurt and Casablanca units all feature the KeyCard security system.

KeyCard is a unique system for theft prevention rendering the system inoperable until it is re-inserted. The card also activates the security coding for the system along with DSC information for display colour and other adjustable settings. Two KeyCards supplied providing a spare KeyCard to programme the set with a different choice of radio pre-sets and settings.

### FREE CAR RADIO THEFT INSURANCE

For 1 year with item nos 1-3.

Such is the confidence of Blaupunkt in their new KeyCard anti-theft system that, in the unlikely event that your KeyCard audio system should be stolen the unit will be replaced free of charge. For eligibility just complete the registration form you will receive when you purchase item nos 1-3 and return it to Blaupunkt. The insurance cover will commence from date of purchase.

## EMINENCE

### EMINENCE HIGH POWER AUTO SPEAKERS.

Made in the U.S.A.

**"There ain't no substitute for cubic inches".**

In America, it's a philosophy which has created some of the most powerful cars the world has ever seen.

And it's the philosophy behind Eminence High Power Auto, the ultimate in-car bass and sub-bass loudspeakers.

Eminence of America has built high-power loudspeakers for the professional audio industry for more than thirty years. You have probably heard Eminence loudspeakers in action at live concerts, since they are the first choice of the world's top P.A. cabinet makers.

In the quest for ultimate in-car bass, there was no better starting point than the world's biggest, most powerful loudspeakers.

Eminence High Power Auto loudspeakers are based on the virtually indestructible chassis of Eminence P.A. speakers. One look at the substantial magnets and drive assemblies tells you that these are no ordinary car speakers.

The force and clarity with which Eminence High Power Auto loudspeakers reproduce sound is due to a combination of their sheer size and the fine engineering of the voice coil and drive assembly.

Their size provides the raw strength to generate high Sound Pressure Levels and withstand your amplifier's output, but it is the astonishing sensitivity and freedom of movement of the voice coil which makes the most of your amplification system.

The result is that Eminence loudspeakers actually **sound louder** than speakers boasting similar power-ratings simply because their efficiency doesn't waste your amplifier's energy - it turns it into sound. **Loud sound.**

The specially treated cone material withstands the temperature and humidity changes in auto installations,

### IMPORTANT

The power ratings of Eminence speakers are quoted in Watts RMS, the professional measurement of power handling. This should not be confused with the terms "Music Power" (typically 2 x RMS rating) and "Peak Music Power" (up to four or more times the RMS rating) i.e. the 454 has a "Music Power" rating of 800W, "Peak Music Power" 1600W!!

and the distinctive blue polyurethane cone edge provides bass enhancement and isolation of the speaker's movement from vehicle vibration.

From the compact 289 to the awesome 454, these deliver a bass kick with a vengeance. Once you've felt it, you'll know why there's no substitute. . .

The Eminence 289 and 327 offer high-power handling in a compact chassis, making them particularly versatile. Use them in footwells, door-panels or

parcel shelves as stereo pairs or in arrays for multi-speaker bass systems. A smooth frequency response extending up to midrange allows them to be used for low-mid, or combined bass and midrange in 2-way systems.

For heavyweight bass installations, take a look at the 350 and 383. A mighty power rating of 200W<sup>RMS</sup> means if you've got the space, these will give you the bass! With their extended low-frequency

response, these also work well as mono sub-bass drivers, particularly the HiPer versions in a measured enclosure.

If you're searching for a bass experience beyond decibels and onto the Richter Scale, then there's no substitute for the Eminence 427 and 454! Measuring 15" and 18" in diameter, with power handling of 300W<sup>RMS</sup> and 400W<sup>RMS</sup> respectively, *nothing* delivers

fundamental sub-bass like these.

## 1 ACOUSTIC SUPER SHELF

Sound quality is easily improved by installing a better radio cassette or disc player. The best gains will be achieved by fitting a separate amplifier and larger speaker system, but where do you put these larger speakers? The ideal place in a car is the rear shelf, but the original rear shelf is flimsy and vibrates as soon as the volume is turned up. Your music is out of control — especially the bass. What is the answer? Fit an Acoustic Super Shelf.

- The Shelves are made from very high quality 18mm medium density fibreboard, and come complete with

acoustically transparent fabric (available in 16 colours), new shelf hangers and hinge pins.

- All Acoustic Rear Shelves are manufactured to the highest standard and custom made to fit each individual car. They are designed for mounting heavy duty speakers and amplifier systems into hatchback or saloon cars without the usual frustrating vibration problems.
- All Shelves are supplied uncovered and without any holes cut for speakers, purely so that you may fit the speaker of your choice and cover the shelf accordingly.

- **OUT OF SIGHT!** One of the major design aspects of the Acoustic Shelf is that you can still enjoy the dynamic sounds of your speakers even when your speakers are under the shelf, out of sight of prying eyes — thanks to the acoustically transparent cover.
- Any speaker can be fitted to the Acoustic Shelf in any way you like. The Acoustic Super Shelf doesn't only look smart it greatly improves the bass response

of any speaker fitted, due to the sheer density of the fibreboard, resulting in 'concert hall' performance.

- Colours of acoustic fabric supplied with shelves: Black, Ford Grey, Deep Blue, Tan, Rover Grey, Sky Blue, Mid Blue, Deep Red, Burgundy, Mercedes Beige, Sandstone Beige, Dark Brown, Light Grey, Pure White and Peugeot Red.

## GAMMA AUTO ALARM SYSTEMS

Gamma Auto Alarm Systems are one of the world's leading manufacturers of car alarms. They have a reputation for producing the best car alarms at competitive prices, and are renowned for their quality, reliability and technical innovation.

Gamma Alarms offer the latest in terms of features and functions which are being updated all the time to stay ahead of even the most determined and sophisticated thieves. They are all equipped with engine immobilisers which will make it almost impossible for joyriders and professional thieves to start your vehicle and drive away with it.

Gamma Auto Alarms are suitable for all types of cars and light commercials with a wide range of standard functions to cater for every possible requirement.

The alarm you have selected will be installed by Gamma's nationwide team of qualified engineers, who will install it at your home, place of work or if a mobile engineer is not located in your area we will arrange for a convenient time for you to bring your vehicle to your local Gamma Installation Centre. This will ensure that your alarm system is installed correctly and to the highest standards.

To reinforce Gamma's reputation for quality and to show the confidence they have in their products, all Gamma

Alarm Systems come with a lifetime guarantee. They have all been tested and approved by the Department of Trade and Industry (DTI) and they conform to BS6803: Part 2.

If your car and its contents are worth protecting — fit the best — fit a Gamma Auto Alarm System.

### 1 GAMMA GOLD ALARM SYSTEM

Activated from keyring remote control transmitter.

The Gamma Gold Alarm System provides the ultimate protection for your vehicle and its contents. Central locking and ultrasonic exclusion facility are included as standard features, and Passive Alarm Arming is available as an optional extra. If you consider your vehicle to be a "desirable" target for a thief, then this system will give you peace of mind whenever you leave it unattended.

#### Standard features:

- Armed and disarmed by remote control
- 2 individually programmed keyring transmitters
- Flashes hazard warning lights
- Instantaneous shock wave sensing
- Boot and bonnet protection
- Detects voltage drop — switchable
- Flashing LED warning light
- Automatic alarm reset
- 118 decibel high energy siren
- Ultrasonic interior protection with Air discriminator and ultrasonic exclusion facility
- Engine immobilisation

- 2 window warning stickers
- 2 alarm override keys
- Panic — anti-aggression facility

### 2 JACKPLUG IMMOBILISER

This device immobilises up to three circuits including starter motor circuit.

When leaving your car the small red LED automatically flashes and if anyone attempts to start the car without inserting the jack plug the horn will sound when the ignition key is turned and the starter motor will not work.

To start the car with the jack plug, simply insert the plug into

the socket and remove. The LED will go out and the car can be started normally.

#### Features:

- Immobilises up to 3 circuits
- 19,000 code combinations
- Easy to operate — ideal for multi-user vehicles
- Arms automatically
- Anti-hotwire hooter alert
- Stylish jack-plug design
- Immobilisation unimpaired by disconnecting and reconnecting battery
- Power-loss safety feature
- Psychological deterrent — LED indication of armed mode
- System override facility
- Exceptionally low battery drain — 15 mA typical
- Easy to install
- 12-month warranty

## SELMAR CAR ALARMS

After a major research and development programme, Selmar have produced a range of car alarms to meet the demands of today's motorist.

Advanced micro-chip technology provides multi-faceted protection to effectively deter the car thief or joy rider, whilst ensuring reliability and ease of installation. (All kits are supplied with a full fitting kit and comprehensive instructions.)

Selmar alarms are operated by DTI approved remote control transmitters. (Under the Wireless Telegraphy acts it is an offence to use transmitters which do not have this approval.)

There are three models available, depending on the level of sophistication required — Easy-Fit, System Plus and Professional. Furthermore a full range of accessories enables the motorist to achieve even greater security.

## STOPLOCK

### 1 STEERING IMMOBILIZER

STOPLOCK 2 is a highly effective and simple alternative to expensive and complicated electronic alarms. It locks onto and through the steering wheel and makes the vehicle impossible to drive away. Because it requires no specialist installation it can be transferred from vehicle to vehicle, yet the high security lock with 10,000 combinations is extremely difficult to foil.

Designed to be highly visible from outside the vehicle to deter thieves, it is quick and easy to fit, even when sitting in the driving seat. Two keys are supplied, and replacement keys are available by post.

STOPLOCK is made from hardened steel with a soft outer covering to prevent marking the vehicle's interior.

### 3 RADIO CASSETTE LOCK

Radio-Cassette Lock is highly visible from outside the car, making it a simple, but extremely effective deterrent to theft and vandalism. When the thief sees, from outside the car, that the cassette player is physically protected he will invariably move on to an easier target. This not only saves the unit but also the damage to the car itself.

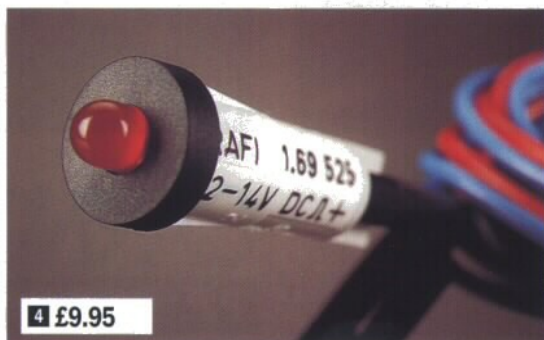

This new lock can be fitted and removed in seconds to all front loading players, and its unique design is a double deterrent to thieves.

Firstly, it locks into the cassette slot and cannot be removed without ruining the player, making it useless to a thief. The non-pick tumbler lock has 2,500 combinations.

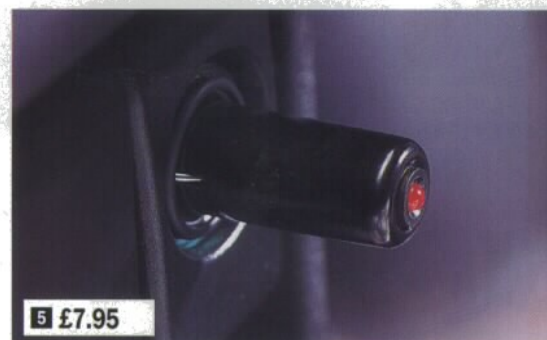

Secondly, the lock is attached to the steering wheel by an incredibly strong braided steel cable, making it ideal for use with removeable as well as fixed radio-cassette players. The cable is plastic coated and tough enough to resist bolt cutters, files and saws.

Radio-Cassette Lock will not damage even the most sophisticated players and requires a simple, once only adjustment to suit all types of players.

### 1 SRD 2000 THE WORLD'S SMALLEST 3 BAND DETECTOR

Designed for the professional motorist, the dash or visor mount micro sized SRD 2000 provides the user with exceptional detection range over the three frequencies. X, K and Ka. The use of exclusive and patented Fundamental Mixer Technology (FMT) ensures that the range on K and Ka bands is equivalent to that of X band, a significant advantage over all other detectors which utilise simple second and third harmonics to detect these two frequencies. The latest surface mount production techniques have produced the world's smallest detector in conjunction with many advanced features at a realistic price level. The SRD 2000 takes 3 band detectors to a new level of sophistication.

- Fundamental Mixer Technology (FMT) dramatically increases radar warning range on both K and Ka bands.
- Radar Signal Verification (RSV). An advanced signal processing technique that automatically eliminates I.F., the most common source of false signals.
- Compuhertodyne Digital Signal Processing (DSP) enhances sensitivity and selectivity.
- Separate X, K and Ka audio alert.
- Intense 3 second Instant On/Pulsed Radar alert.
- City/Highway Button to reduce unwanted X band alerts WITHOUT reducing sensitivity and range.
- Audio Mute Button provides continuous or automatic muting of audio alerts.
- K/Ka Band Priority Override selects the more important K or Ka alert should a simultaneous X band signal be received.
- LED Signal Strength Meter provides both visual confirmation and relative distance of signal detection.
- Size: 3.45" L x 2.25" W x 0.8" H.
- Weight: 4 ounces.
- Guaranteed for 3 years.

### 2 SRD 5000 CORDLESS BATTERY POWERED 3 BAND DETECTOR

#### Complete Freedom

Snooper Electronics combines an Advanced Battery Powered Design with revolutionary and patented three band technology to make the SRD 5000 Cordless unequalled in both convenience and performance. Battery power means complete portability – the SRD 5000 Cordless can be mounted almost anywhere. And one 9 volt battery provides several months of high performance radar detection.

#### The FMT® Advantage

SRD 5000 Cordless also incorporates Fundamental Mixer Technology (FMT®) for unequalled sensitivity. This dual patented design breakthrough dramatically increases the range of Ka band. All other three band radar detectors use the fundamental mixer response to detect X band radar and a simple harmonic of the mixer to detect K and Ka band. This reduces the range on the all important Ka band to as little as 400 feet or less! FMT® increases that range to over a third of a mile – an industry leading figure. It's like having three high performance radar detectors in one.

#### 'Super' Wideband Ka

Ka band on 34.3 GHz has been used extensively in Europe with Photographic Radar for a number of years but its use has recently been extended with the Stalker Gun. This latest radar can now operate on any frequency between 33.4 GHz and 36.0 GHz it would be 'invisible' to normal 3 band detectors. However, Super Wideband ensures the user is always protected by sweeping the entire Ka band six times a second. Combining with FMT® – it provides unrivalled performance for detecting all types of radar.

- Separate Audio/Visual Alerts.
- Instant On/Pulsed Radar Warning.
- Memory Retention of all the user settings.
- Dim or Cancel illumination.
- External jack for optional earphone or power cord.
- RSV® eliminates IF interference.
- Three types of audio mode.
- City Mode – Minimises false X band alerts WITHOUT reducing sensitivity.
- Auto Shut Off – to optimise battery life.
- K, Ka Band priority override.
- Digital Signal Processing.

### 4 SRD 6060i RADAR/LASER DETECTOR

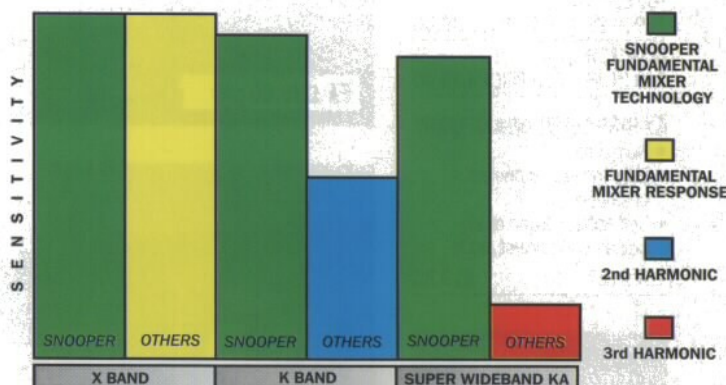

Snooper SRD 6060i is the absolute pinnacle of Radar and Laser Detection Technology. Each unit is hand built from carefully selected components in order to provide the optimum range on all types of Radar and Laser devices.

SRD 6060i easily outperforms all mass produced detectors on the market including Snooper's own class leading models. Stringent quality control and the unique design translate into performance that is at the very edge of the technological envelope.

Snooper SRD 6060i is the most expensive detector ever manufactured but if you need the protection and peace of mind its sophistication brings then look no further.

- Separate X/K/Ka audio/visual alerts.
- Laser audio/visual alert: A flashing (L).
- Instant-On/Pulsed Radar Warning.
- Memory Retention for preferred settings.
- PWR/VOL (Power/Volume Button).
- DRK (Dark Button): Dims or cancels illuminated displays.

## KC DAYLIGHTERS

Incredible power. Incredible value. The KC Daylighter range offers lamps of unparalleled power. This 150 watt light generates a massive 350,000 candlepower with a useful reflective range approaching 4 miles. KC's are supplied with the traditional housing and patented vibration resistant mounting using Westinghouse optical units.

Because KC lamps were designed to use in competition they are ideal for high speed night driving anywhere. With an overall diameter of 6.25ins, and a depth of 5ins, the lamps are compact, which allows them to be mounted on most vehicles. Daylighters come complete with yellow covers which are also available separately. 150W lamps are completely legal for use on public roads but, as with any auxiliary lights, they must be wired and mounted in accordance with the law.

## SAT ADDITIVES

### ENHANCED POWER AND PERFORMANCE

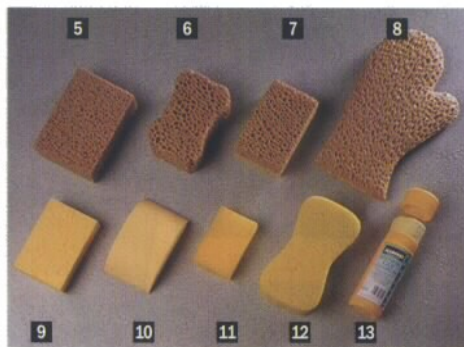

What makes additives so important today?

Not only are car engines becoming more and more sophisticated - today's car drivers are demanding improved performance, greater durability, lower fuel consumption and reduced environmental emissions.

The automobile industry has reacted to this trend by introducing "lean burn" engines and catalytic converters. However, in everyday driving practice these new technical solutions necessitate improved quality fuels and lubricants.

SAT Additives are designed to enhance and optimise fuel and lubricant performance. In view of today's difficult running conditions these additives are more important than ever before... for economical, safe and environmentally sound driving.

Each individual SAT Additive offers car drivers clear benefits in a specific field of application. All additives are manufactured in Germany and T.U.V. approved.

## 1 RAIN-X - THE INVISIBLE WINDSCREEN WIPER

### WHAT IS RAIN-X?

Rain-X is a clear, colourless liquid that has an amazing effect on glass and plastic (acrylic and polycarbonate). Like water off a ducks back... it repels rain, frost snow and dust. It seals, polishes and conditions against sun, sand, salt and pollutants and helps prevent insects, mud and grime from sticking - making cleaning a breeze.

### WHY USE RAIN-X?

Build up road grime, dust, fumes and pollutants leave a haze on windcreens - severely reducing visibility. It's a thin haze that becomes blinding when it rains or becomes glary. Rain-X provides that extra dimension to driving visibility... and when you see more clearly, you drive more safely.

### IS RAIN-X ONLY FOR BAD WEATHER USE?

Rain-X has been tested on aeroplanes, cars, trucks, vans, four wheel drives, helmet visors and goggles for thousands of kilometres. The test proved Rain-X to be a truly ALL WEATHER formulation. Visibility was improved in all conditions - wet and dry. Virtually eliminates insects, highway residue, mud splatter and salt spray from all glass surfaces.

### HOW DO YOU USE RAIN-X?

It's easy. You just wipe it on and... wipe it off. Use it on windcreens side and rear windows, headlights, tail lights, fog lights, helmet visors, goggles and side view mirrors.

Re-apply Rain-X about once a month, or every 2,500 miles to maintain peak performance. Don't worry about putting one application over the other, because there is no possibility of 'build-up'. You can only improve visibility with another application. You will also notice how much easier it is to clean your vehicle's glass surfaces.

273 1468 (100ml) £6.95

### RAIN X ANTI FOG

For interior glass and visors.

273 1469 (200ml) £7.95

## CRYSTAL-GLO ACRYLIC CAR POLISH

Crystal-Glo has ultraviolet inhibitors to protect your vehicle's paint, lacquer and clear coats from fading. This polymer acrylic is applied as a liquid to new or used vehicles to simultaneously remove oxidized

paint, road film, tar, grime, tree sap, etc. The easy wipe on, wipe off formula revitalises and restores dull finishes. On black paint it leaves no swirls, streaks or marks.

11 16 ounce bottle

12 8 ounce bottle  
263 4490 OUR PRICE £7.99

## 13 CRYSTAL-GLO TOTAL ACRYLIC WASH

Contains the same protective acrylic formulation, in a less concentrated form, as those at work in Crystal-Glo Acrylic Car Polish. Each time you wash your vehicle, active protective agents are added to your car's finish. Crystal-Glo Wash cleans through a non harmful chemical action rather than with filmy detergents. Cleans, rejuvenates shine. Prolongs polymer protection.

## ROOF-BOXES

KAMEI-BOXES can be used for transporting weights of up to 110lbs, or 50kg. Since they can be used throughout the year in rain, wind and snow, the KAMEI BOXES are an ideal addition to the limited space of a boot.

The aerodynamic style, tested in the wind tunnel, and the highly impact-proof lightweight DUROKAM® material developed by KAMEI ensure that no additional driving noises or appreciable extra fuel

consumption are caused.

Two gas-pressure lifting devices, keep the lid wide open until everything is stored away and secured from movement by the use of fastening belts. The two safety locks are fitted with protective covers to keep them free of dirt and prevent them from freezing.

## OUR POLICY

### SATISFACTION GUARANTEED

We want you to be pleased with all goods bought from Carnoisneur. Your guarantee of satisfaction is that any item supplied by us that does not meet with your approval may be returned within fourteen days for either exchange or a full refund.

### DESPATCH

Most orders are processed the day they are received and despatched within 48 hours. You will be notified if your order or part of your order is subject to unusual delay.

### PRICES

In the past years most of our printed prices have been maintained for a full twelve months after publication of the Carnoisneur catalogue.

Occasionally, however, cost changes are inevitable due to inflation and exchange rate fluctuations on imported goods. We therefore reserve the right to change prices without notice.

### ORDER QUERIES

Please first check for our comments on all documents enclosed with your order. A quick telephone call to (0582) 471700 will in most cases be the simplest and most efficient way of answering any queries that may arise from your order. Please have ready the sales invoice supplied with the goods and ask for the Customer Service Manager whose first responsibilities are to look after you.

### BACK ORDER/CREDITS

We endeavour to hold good stocks of most listed items at all times. If for some reason we are unable to supply a particular item with your order we may

- a) back order that item and send it on as soon as it is available or
- b) if long delays are expected, cancel this part of your order and refund you or notify you that your account is in credit; you may choose to ask for a refund or use the credit as part payment for your next order.

### VAT

All goods are priced including VAT at 17%. If the rate of VAT changes, obviously our prices will change accordingly. Please remember our prices include VAT when comparing prices.

### LET US KNOW

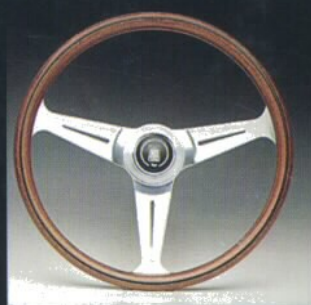

If any aspect of our service has not met with your approval, we are anxious to know about it. Write to Philip Hammond, Managing Director, and your letter will receive prompt personal attention.
